INVITATION TO A LIVE WEBCAST

Diagnosing and Managing the Hypertensive Cat: Practical Blood Pressure Monitoring in Practice

November 19, 2026 at 7 p.m. (EST)

5:00	6:00	7:00	8:00	8:30
BC/YK (PT)	AB/NWT/SK (MT/CT)	MB/ON/QC (CT/ET)	PEI/NB/NS (AT)	NL (NT)

Feline hypertension is an important clinical condition that may go undetected without routine assessment. This webcast will provide veterinary teams with practical strategies for incorporating blood pressure monitoring into everyday feline care.

Feline specialist **Dr. Elizabeth Ruelle** will discuss the pathophysiology, clinical signs, diagnostic and management challenges, and current treatment considerations for feline hypertension. **Dr. Eric Brousseau**, DVM, and **Jade Brattain**, RVT, will share their experience successfully integrating routine blood pressure monitoring into general practice, including practical lessons that may help other teams establish a consistent approach. The session will conclude with an interactive panel Q&A featuring all three speakers.

FEATURED SPEAKERS

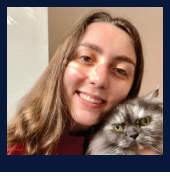

Elizabeth Ruelle, DVM, DABVP Feline Specialist

A born and raised Calgarian, Dr. Liz's academic career began with a Bachelor of Science degree from the University of Calgary. Combining her love of travel and determination to be a veterinarian, Dr. Liz studied at the University of Veterinary Medicine in Kosice, Slovakia. She graduated, with great distinction, in 2005 as a Doctor of Veterinary Medicine. After returning home, Dr. Liz has spent her veterinary career working exclusively with cats (so many cats!). In 2009 she became owner of Wild Rose Cat Clinic. In December 2012 Dr Liz succeeded in her pursuit of board certification by becoming a diplomate of the American Board of Veterinary Practitioners in feline practice. In addition to private practice, Dr. Liz loves to teach and has lectured on topics including cat health, weight management, and communication. When not focusing on the kitties, she is a busy mom to both her human and fur children (Husband Jeff, Abby and Greyson; cats Utinni and Zeb) and likes to dabble in home renovation projects.

Eric Brousseau, DVM

Dr. Eric is the medical director at VCA Matthews Animal Hospital in London, Ontario. He has a Bachelor of Science from Guelph and a Doctor of Veterinary Medicine from University College Dublin. He has been in practice since 2016. When off the clock, Dr. Eric enjoys going on hikes, listening to K-Pop and playing video games. Dr. Eric has a fluffy orange cat called Bacon. He will be discussing blood pressure in a practical setting as a general practitioner.

Jade Brattain, RVT

Jade is an RVT who has been working at Matthews Animal Hospital alongside Dr. Eric Brousseau for about five years. In 2021, she graduated from the Veterinary Technician program at the University of Guelph Ridgetown Campus. Although she grew up surrounded by a wide variety of animals, her childhood cat, Dennis, turned her into a true cat person. Today, she shares her home with her husband and their very fluffy cat, Freyja.

Following this presentation, stay with us for an extra 15 minutes to learn about Amodip® with Dr. Shannon Walsh from Ceva Animal Health.

Presented by

Shannon Walsh, DVM, Veterinary Services Manager, Ceva Animal Health

Learn about Amodip®, the first and only veterinary-approved amlodipine in a chewable, palatable tablet for the reduction of systolic blood pressure in cats with systemic hypertension, and find out how to request educational resources.
