Beyond insulin, new strategies for diabetes management in cats are rapidly changing the way we care and plan for our diabetic patients. In this live webcast, we will explore new therapeutic options, advances in nutrition for diabetic cats and the spectrum of care considerations. The presentation will highlight recently published guidelines and how we can make use of updated data to improve outcomes in the management of feline diabetes mellitus.

**Join us to discover the latest strategies for diabetes management in cats and improve outcomes for your patients.**

**Kelly St. Denis**  
MSc, DVM, Dipl. ABVP (feline practice)

Dr. Kelly St. Denis is board-certified with the American Board of Veterinary Practitioners (ABVP) in the specialty of feline practice. In her early career, she trained in molecular biology and immunology, working in the fields of diabetes and cancer research. She graduated from the Ontario Veterinary College in 1999 and completed her ABVP certification in 2013 with recertification in 2023. Dr. St. Denis is co-editor of the Journal of Feline Medicine and Surgery and JFMS Open Reports, a consultant on the Veterinary Information Network and an internationally known author and lecturer on all things feline. She currently works in clinical practice two days a week.
