

INVITATION TO A LIVE WEBCAST

Toxicology Toolkit: Optimizing GI Decontamination and Activated Charcoal Use in Dogs and Cats

June 2, 2026, at 12 p.m. (EDT)

9:00 10:00 11:00 12:00 1:00 1:30
BC (PDT) AB (MDT) SK/MB (CDT) ON/QC (EDT) PEI/NB/NS (ADT) NL (NDT)

When a pet ingests a toxin, the “golden window” for intervention is brief. Decisions regarding gastrointestinal decontamination must be made quickly, balancing the potential for success against the risk of complications. In this 60-minute webcast, **Dr. Holowaychuk** will provide a comprehensive, evidence-based review of GI decontamination strategies in small animal practice. The session will begin with the latest protocols for inducing emesis, including pharmacological choices and contraindications. The second half of the presentation will take a deep dive into the clinical use of activated charcoal. We will discuss the science of adsorption, identifying which toxins are (and are not) effectively neutralized, and how to manage potential side effects such as hypernatremia. Using clinical case examples, participants will gain the confidence to decide when to decontaminate, how to do it safely, and when to pivot to other supportive care strategies.

Marie Holowaychuk

DVM, Dipl. ACVECC

Dr. Marie Holowaychuk is a board-certified veterinary emergency and critical care specialist with more than 20 years of experience in clinical practice and academia. She currently works as a locum relief specialist in emergency and critical care hospitals across Canada and the USA, providing her with a unique and current perspective on the diverse challenges facing emergency teams today. A prolific author and researcher, Marie has published more than 30 peer-reviewed articles and numerous textbook chapters on topics related to emergency medicine and critical care. She is a frequent international speaker, known for providing practical, evidence-based clinical guidance that helps veterinary teams manage high-stakes cases with confidence. In addition to her clinical work, Marie is the founder of Reviving Veterinary Medicine, where she supports the mental health and sustainability of the veterinary profession through coaching and advocacy.

Following our webcast, we invite you to stay on for an extra 15 minutes to learn more about Carbogel™ and Carboprime™.

Agathe Faure

Marketing assistant, Dômes Pharma

Discover practical, proven solutions to enhance toxin management in veterinary practice. This brief presentation will highlight Dômes Pharma, its expertise, and its dedicated portfolio, including Carbogel™ and Carboprime™, to support your clinical decision-making in toxin management.
