Cats may have nine lives, but their joints still age! In this CE presentation, **Dr. Ruelle** will cover everything you need to know about feline arthritis, from the DJD timeline to those easy-to-miss clinical signs (and how to help caregivers spot them), plus a review of both old favorites and newer therapies to help our purrfect patients age gracefully.

**Elizabeth Ruelle**  
 BSc, DVM, Dipl. ABVP (feline)

A native Calgarian, Dr. Liz Ruelle's academic career began with a Bachelor of Science degree from the University of Calgary. Combining her love of travel and determination to be a veterinarian, Dr. Liz studied at the University of Veterinary Medicine in Kosice, Slovakia. In 2005, she graduated with great distinction as a Doctor of Veterinary Medicine. After returning home, Dr. Liz has spent her veterinary career working exclusively with cats (20+ years...so many cats!). In 2009 she became owner of Wild Rose Cat Clinic. In December 2012, Dr. Liz succeeded in her pursuit of board certification by becoming a diplomate of the American Board of Veterinary Practitioners in feline practice. In addition to private practice, Dr. Liz loves to teach and has lectured on topics including cat health, senior cat care, and communication. When not focusing on the kitties, she is a busy mom to both her human and fur children (Husband Jeff, Abby and Greyson; cats Utinni and Zeb) and likes to dabble in home renovation projects.

Following this presentation, we invite you to stay on for an extra 15 minutes  
 to learn more about Portela® and Lenivia®.

**Chancie Knights,**  
 DVM PhD Technical Service Veterinarian, Zoetis

An introduction to Portela® (relfovetmab) for cats and Lenivia® (izenivetmab) for dogs – both effectively alleviate osteoarthritis pain for 3 months after the first injection. Zoetis unveils two new products that complement Librela® and Solensia® in the portfolio of anti-NGF monoclonal antibody options. Osteoarthritis care begins with a solid foundation—tailored to each patient. With flexible, personalized pain relief options, we aim to enhance mobility and improve patients' quality of life.
