

VETERINARY HOSPICE & EUTHANASIA TRAINING INSTITUTE

Has anyone on your team
received formal hospice training?

THE GAP

Veterinary teams tailor care to every life stage except the last. Does your team transition from treatment plans to comfort care plans, or offer dedicated hospice reservations and modalities? If not, this is your opportunity to master the clinical standard your hospice patients deserve.

THE CHALLENGE

NOT ENOUGH TRAINING

Veterinary professionals are expected to navigate one of the most challenging life stages with no formal training.

NOT ENOUGH TIME

DVMs lack the time to do the extensive hand-holding families require during this time. Human health care has had hospice-trained nurses for decades. It works.

THE OPPORTUNITY

Hospice care isn't just possible — it's a new and sustainable stream of revenue, strengthens client loyalty and keeps families coming back.

"This course shifted my perspective on end-of-life care. I was able to immediately put the technical and communication skills learned from Emily Piché & Dr. Amir into practice." — Dr. Natalie Davis

3-DAY WORKSHOP

Nov 20 to 22, 2026

NVA Canada

1115 North Service Rd W, Oakville ON
L6M 2V9

14 RACE CE

Special Guest Speaker
