

**WEDNESDAY  
FEBRUARY 11<sup>TH</sup>  
2026**

**11 AM - 5 PM ET**

**Vet Alliance believes in the power of learning, and the importance of collaboration in veterinary medicine.**

Every single team member must be successful in order for the practice to reach its fullest potential and yet, many roles on the team do not get access to continuing education the way that the credentialed team members do. While product lunch-and learns can be helpful, there are rarely opportunities to get strategically immersed in personal and professional education together - improving confidence, while understanding how we impact each other's success every day.

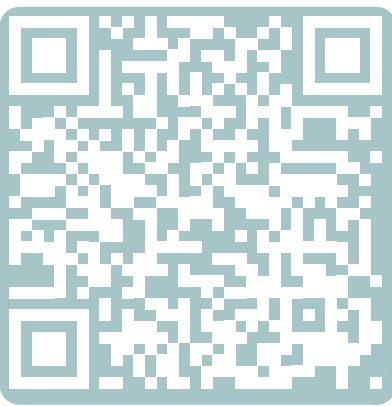

**This is the reason we have created unitED.**

unitED is a one-day, virtual, continuing education event designed to harness the power of teams. Every expert will share their knowledge with the intention of elevating individuals, no matter their role or tenure. Each session is designed to inspire independence, connection, collaboration and inclusivity.

**This unique educational opportunity is *OPEN TO ALL PRACTICES*.**

Veterinary medicine is about more than just the medicine, and it is why unitED is so important. Your team will be uniting with Canadian veterinary teams across the country for a day of learning that will allow us to uplift our entire profession; developing resilient veterinary professionals and ensuring thriving teams, successful businesses, healthy patients and satisfied clients, nationally.

**While you may choose to participate alone, we strongly believe in the concept of shared learning. For that reason, this registration fee enrolls, not only you, but your entire practice team in unitED!**

**SCAN HERE  
TO REGISTER**

**REGISTRATION \$499<sup>+TAX</sup>  
PER PRACTICE**

**VET ALLIANCE MEMBERS:  
\$399<sup>+TAX</sup> PER PRACTICE**

Registration to the live event unlocks access to recordings so that team members who cannot join live can still benefit from the unitED learnings.

While on-demand access will last for 3 months - Vet Alliance members will have continued access in Octopoda for the duration of their membership.
