## Chilly Dog Sweaters

Chilly Dog was founded in 2001 to fill a niche. Having a retail store in downtown Philadelphia, I was unable to find a well made dog sweater at a moderate price point. We were able to form a relationship with the Inca Artisans in South American to create a hand knit wool dog sweater that would fit every dog! We have always followed fair trade guidelines, our sweaters are made from 100% wool and use plant dyes.

Chilly Dog has been able to employ many knitters in healthy workplaces, and enable them to support a better lifestyle in their small villages by being paid a fair living wage. Chilly Dog keeps up with the latest trends to keep dogs fashionable as well as warm. These are the warmest and best quality sweaters you will find out there! Don't let your dog be left out in the cold! Available in assorted patterns and sizes X small through XXX Large, \*Note: the best way to size your dog is by weight.

## Petsafe Squeak N Treat Ninja Star - New!

Your dog won't be able to disguise his love of the PetSafe Squeak 'n Treat Ninja Star Dog Chew Toy! This durable dog toy is made from vanilla-scented rubber and designed to hold up to even the toughest chewers. The Squeak 'n Treat Ninja Star delivers a satisfying squeak while also releasing treats as your pet plays. This combination of sound and tasty treats appeals to the natural prey drive of dogs. The patented Treat Meter prongs hold your dog's favourite treats or kibble. As your pooch plays, treats pop out. If your dog finds the toy too challenging, try trimming the patented Treat Meter prongs. Once the prongs are cut, there is no going back so we recommend trimming only a little at a time and then testing. The Ninja Star is free from stuffing and fabric and can be easily cleaned in the top rack of your dishwasher. **Key Features:** • Durable Design - The PetSafe Squeak 'n Treat Ninja Star Chew Toy is made of strong, vanilla-scented rubber that holds up to tough love from heavy-duty chewing • Treat Dispensing - Fill the Squeak 'n Treat Ninja Star with your dog's favourite treats or kibble; as your pet plays, treats randomly pop out; the patented Treat Meter treat dispensing prongs can be trimmed to let more treats fall out • Mess-Free Squeak - The plush-free Squeak 'n Treat Ninja Star means no more pieces of fabric or stuffing scattered across floors; the stimulating squeaker appeals your dog's natural prey drive • Easy to Clean - The Squeak 'n Treat Ninja Star toy can be easily cleaned by putting it in the top rack of your dishwasher. - Pure essential oils are highly concentrated and must be diluted before using.
- Keep essential oils and aromatherapy products out of reach of pets and children.
- Do not use essential oils with birds, fish, reptiles or small mammal and rodent habitats.
- Keep essential oils away from eyes, ears, nostrils, anal and genital areas. If essential oils do contact these areas, wash with milk or yogurt.
- Undiluted or high percentages of essential oils can overwhelm your dog's sense of smell, cause systemic sensitization, and irritate the skin or lungs.
- Diffuse in well-ventilated areas for short periods of time: 15 minutes 1-2 times daily can be sufficient. Place diffusers away from bird cages and fish tanks, and make sure cats can easily leave the area.
- Store essential oils and products away from direct heat and sunlight. Undiluted essential oils should only be stored in glass bottles, and diluted aromatherapy products can be stored in glass or PET plastic.
- There is no regulatory agency that grades essential oils: therapeutic-grade, pharmaceutical-grade or medical-grade is merely a marketing ploy.
- The use of essential oils does not replace qualified veterinary consultation or treatment.

EARTH HEART PRACTICES RESPONSIBLE AROMATHERAPY™

- Situations (and dogs) are unique: Using a highly diluted product allows you to control the amount and frequency of dosage to use the least amount needed for the desired result.
- Resource protection: Diluting essential oils prevents the overharvesting of plants from both overuse and exploitation of depressed economies.
- Protect physical health: Some essential oils are irritating to skin and mucous membranes when used in high concentrations.
- Less is more: Trained (certified, registered, clinical) aromatherapists promote minimal exposure to prevent sensitization through controlled dosage and dilution.
- Cost effective: Diluting essential oils is not only safer, it's also more affordable.

## Training

### Petsafe Rechargeable Bark Control

The PetSafe® Rechargeable Bark Control collar uses several features designed to shorten the training phase and promote good behaviour. The bark control collar has a unique sensor that provides the most reliable bark detection available. It also uses temperament learning to decrease and in most cases eliminate nuisance barking. The system has 15 levels of static stimulation. It begins with low-level stimulations. If excessive barking continues the stimulation intensity will increase with each successive bark until the barking stops. Once the dog has learned to reduce the barking, the initial warning stimulations are reduced. As a built-in safety feature, if your dog barks 15 times or more within a 1 minute 20 second period, the Bark Control collar will automatically shut off for 3 minutes. When the PetSafe Indoor bark control is within range of a barking dog, an internal microphone picks up the sound. The unit automatically emits and ultrasonic tone that can be heard by dogs but it is silent to most humans. Startled by the high pitched tone, the dog should stop barking. In time it will associate its bark with this unpleasant noise. When the dog stops barking, the ultrasonic tone also stops. It is effective up to 8 meters.

**Features:** \*Automatically deters excessive barking \*No collar is needed \*Detects barks up to 8 meters away \*Low battery indicator \*Free standing or can be adhered to door frames, window frames, etc. \*Two units included for multi room coverage. ### OurPets Scratch N Sniff Scratchers

Scratching is a cat's natural method of shedding the outer nail layer of their claws, helping to maintain healthy claws and paws. The OurPets® Scratch-N-Sniff scratchers provide you cats with the benefits of a regular cat scratcher and the added benefit of micro-encapsulated catnip aroma bursts, made with North-American-grown catnip. Millions of micro-encapsulated catnip oil are embedded in the corrugate surface and only release a catnip aroma when your cat scratches to break the capsule. This means that you do not have to add messy catnip flakes to attract your cat. Since the catnip aroma is built-in and only activated by scratching, your cat will be interested for longer because the aroma will not fade as quickly as regular catnip. This way there will always be more catnip for later! Available in 2 sizes.

## Soft Paws Feline Nail Caps

**Features:** Developed by a veterinarian, Soft Paws are vinyl nail caps that glue on to your cat's claws. It covers the claw tips so no damage occurs when your cat scratches. Soft Paws are an excellent alternative to declawing. They are easy to apply at home and cats and their owners love them. They are completely safe and humane and can be used on cats of all ages.

Each package of Soft Paws contains 40 nail caps, 2 tubes of adhesive, applicator tips and easy to follow instructions. One package contains enough nail caps for 4 applications on Kitty's front paws. The adhesive is the same type of adhesive used in many veterinary procedures. The caps and dried adhesive are non-toxic and completely safe. Soft Paws will not interfere with the normal extension and retraction of your cats nails. Your cat can still scratch with Soft Paws allowing normal stretching and scratching behavior to continue. Just no damage will occur. Most cats tolerate Soft Paws extremely well. The vast majority of cats don't even know they are wearing them.

### Sizes available:

**Kitten** - Soft Paws will fit most kittens by the time they reach the age of 12-16 weeks. To test, try a nail cap on first without the adhesive. If it looks too big, don't glue it on. The nail cap should fit snugly, like a glove. The nail caps can also be trimmed to fit if needed. Kittens up to about 5 months of age and 5 pounds body weight generally fit into the kitten size. It is best not to trim kitten's nails before application because their nails are so small.

**Small** - Approximately 6 months of age. Approximately 6-8 pounds.

**Medium** - Approximately 9-13 pounds. Most adult average size cats wear medium.

**Large** - Approximately 14 pounds and up. Very large-boned and large-breed cats wear large. Maine Coons, for example, are very large cats and generally wear large.
